About Alamo1

Alamo1, a San Antonio, Texas based company, began as a commercial demolition company serving the Central Texas Region and procured a variety of heavy equipment to meet varying project needs and demands. Our personnel have emerged from areas focusing on the response needs of the environmental, chemical, and petroleum industries. The company services have expanded rapidly due to recognition that the new and ever changing environmental regulations would have a significant effect on all industrial and waste activities.

Alamo1 is a full service environmental contractor that specializes in demolition, remediation, abatement, specialized construction, technical services, waste transportation, emergency response, oil field services, recycling, health, and safety compliance. Our staff creates and utilizes innovative technologies to improve worker safety and reduce customer costs. We provide turnkey services for a variety of project scopes. The company's permanent staff includes highly motivated professionals who specialize in various fields, such as remedial technology, waste management, remedial action implementation, project management, and closure services. Alamo1's professional staff has extensive experience related directly to the environmental field. The education and technical training of Alamo1 personnel covers the full range of environmental disciplines and assures our customers thorough consideration of all critical environmental aspects key to each project.

For over two decades, our personnel have developed their respective areas of expertise to create one of the leading contractors in the Southwest. Today, Alamo1 has expanded operations to include the Continental United States and OCONUS Locations.

Professional Services

ABATEMENT

- Asbestos Abatement
- Mold Remediation
- Lead Abatement
- Sealing Documentation
- HEPA Vacuuming/Disinfecting
- Handling & Removal of Asbestos or Hazardous/Contaminated Materials

DEMOLITION

- Building Demolition
- Initial Planning
- Budgetary Advice
- Plant and Equipment Salvage
- Plant and Structural Dismantling
- Interior and Exterior Demolition
- Excavation
- Site Remediation and Preparation

EMERGENCY RESPONSE

- Chemical and Oil Spill Emergency Response
- Planning and Response Audit
- Liquid Product Transfer
- Industrial Fire/Explosion Response
- Abandoned Waste Disposal
- Chemical Disposal, Neutralization and Stabilization
- Neutralization/Absorption/Stabilization
- Compressed Gas and Liquid Product Transfer
- Sampling of Hazardous and Non-Hazardous Waste Streams
- Spill Prevention Surveys
- Reactive and Explosives Disposal
- Post-Disaster Decontamination & Restoration
- Oil Spill Cleanup and Refinery Service

REMEDIAL SERVICES

- Hazardous Materials Remediation
- Removal of Wind Turbine Units
- Pond Closures and Capping
- Large/Small Scale Excavation
- Hydro-Excavation
- Air Spading

- Hazardous/Non-Hazardous Waste Stabilization
- Underground Storage Tank Removal
- Tank Cleaning
- Pipeline/Terminal Facility Maintenance
- HDPE Installation
- Waste Water Treatment
- Hazardous/Non-Hazardous Waste Transportation and Disposal
- Drum Removal, Recovery, & Over Pack Disposal
- Sludge Removal and Solidification
- Facility/Site Construction and Closure
- Site Assessment and Characterization
- Treatability Studies
- Bench-Scale Testing
- Full-Scale Implementation
- NORM Projects
- Petroleum Recycling
- Chemical Lab Packing and Disposal
- Remediation System Installation

SPECIALIZED TRUCKING

- Brokerage Services
- Heavy Haul
- Lowboy Trailers
- Flatbed Trailers
- Step Deck Trailers
- Extendable Trailers
- Multi-axle Trailers
- Vacuum Truck Services
- Roll-Off Boxes (Water Tight with Roll Tarps)
- Roll-Off Trailer (double hauler)
- Frac Tanks

DISASTER RECOVERY SERVICES

- Water damage
- Fire and smoke damage
- Storm/Natural disaster damage
- Odor mitigation
- Infection control and decontamination
- Microbial remediation
- 24-hour emergency response

www.alamol.com

Environmental Protection & Recycling

Alamo1 emphasizes recycling of as much materials as possible from all of its operations. We dismantle simple to complex structures quickly, safely, and with minimal environmental impact. We also actively participate in the LEEDS Program. This is always our main goal on all activities. These are some examples of recycling services that Alamo1 provides within each division.

Recycling:

- Reduces disposal volumes
- Reduces transportation costs
- Conserves natural resources
- Secures our competitive pricing on all demolition projects

DEMOLITION DIVISION

Most of the demolition debris that is recovered at each project is then classified and transformed into reusable materials. This process allows us to provide our customers with cost effective solutions, with emphasis on quality and efficiency.

PETROLEUM DIVISION

Alamo1 collects, stores, and processes used oil and other hydrocarbons for their calorific value.

REMEDIATION DIVISION

Oil impacted soils are bio-treated and regenerated to render them reusable as backfill.

Alamo1 has five (5) plant facilities:

2495 South Highway 77
Giddings, TX 78942

8189 Nelson Road
San Antonio, TX 78252

11700 Wallisville Rd #200
Houston, TX 77013

3328 University Park Lane
Irving, Texas 75062

4572 Telephone Road #916
Ventura CA 93003

Phone: 210-404-1220 | Toll Free: 800-322-5085 | Fax: 210-820-3636
www.alamo1.com

Environmental Protection & Recycling

In order to minimize the environmental impact of our operations, Alamo1 runs our own recycled processing facility which converts these materials in a wide variety of useful products. These products are consumed locally and throughout the State of Texas.

The cost of reusing recycled materials can be dependent on the cost of hauling it and subsequently the distance it must be transported. This equates to a cost advantage for the local economy since this recycled material is being produced locally and is available for the many different industries which require it.

Alamo1 accepts delivery of recycled materials, while also providing transportation services to meet our customer's needs.

Alamo1 can recycle a number of products:

- Asphalt Pavement
- Concrete
- Rip Rap
- Road Base
- Dirt
- Limestone

All of the recycled material is of high quality.

Alamo1 has additional capabilities, to include:

- Transport large portable concrete crushers and equipment for use on your site.
- Build Stockpiles for storage for future use on projects.

Recycling helps preserve our natural environment by:

- Minimizing landfill use
- Avoiding dumping fees at landfills
- Reducing fuel costs and roadway traffic
- Improving air quality by reducing vehicle emissions

Qualifications, Equipment and Experience

For over two decades, we have continued to expand our resources, capabilities and technologies. These efforts have culminated in the formation of Alamo1, a premier full-service environmental services contractor nationwide. Alamo1 has combined history, experience, education, and energy of the region's finest environmental professionals to address environmental service issues facing businesses, industries, as well as governments.

Alamo1 follows strict quality control and assurance plans on all projects. The quality control activities regularly taken by the project team continually improve quality at every phase of the project. The quality control and assurance program includes provisions for standards, testing, inspecting, identifying as well as corrective actions and documentation controls. Our multi-phase quality control inspections insure adherence to specifications and project requirements. This approach includes inspections of work elements during preparatory, initial and follow-up phases.

EQUIPMENT Company assets include a transportation fleet, heavy equipment, portable rock crusher, emergency response and spill containment equipment, scientific field instrumentation, and equipment for all levels of personnel protection.

INSURANCE AND BONDING Alamo1 maintains a comprehensive portfolio of insurance coverage, including Contractors Pollution Liability, MCS 90 for hazardous waste transportation, professional liability, general liability, workers compensation, automobile and other special coverage. In addition to extensive insurance coverage, Alamo1 maintains substantial bonding capacity.

SAFETY As part of Alamo1's commitment to safety, we maintain a staff of safety professionals with backgrounds in chemical engineering, industrial hygiene, environmental protection, accident prevention and protection, indoor air quality and ventilation, ionizing and non-ionizing radiation, and remediation. Alamo1 promotes safe work practices via intensive and continual worker training, as well as through strict enforcement of the written safety program.

INFORMATION TECHNOLOGY Alamo1 maintains a staff of information technology professionals to maintain and improve the company's information systems.

OFFICES Alamo1 maintains offices in Texas and is headquartered in San Antonio, Texas.

OWNERSHIP Alamo1 is a privately held company chartered in Texas.

Key Personnel

Our professional staff includes registered environmental professionals, safety specialists, geologists, and chemists. With more than 200 associates on staff, employees are available to respond to incidents and spills of both hazardous and non-hazardous materials. All of our response and field personnel are trained in emergency response, hazardous materials handling, incident command and confined space entry and rescue. We maintain additional personnel to assist with emergency and non-emergency response, project cleanup, and scheduled remediation projects. Individual certifications and resumes are available upon request from the corporate office.

ALEX SALAS – PRESIDENT, CEO

As President and Chief Executive Officer, Mr. Salas provides leadership for the organization's growth and performance at all levels to ensure optimal customer service and business longevity. He continuously works to foster and strengthen relationships with technical and contracting personnel and customers and has traveled around the world in pursuit of new business opportunities with clients as well as to seek out acquisition targets and tuck in opportunities. Mr. Salas negotiates contracts and implements strategic teaming relationships to ensure the company provides innovative service solutions to all customers. He is knowledgeable of federal, state, and local laws and international building codes governing construction projects worldwide. He also has extensive working knowledge of federal, state, and local environmental laws and regulations as well as broad based experience in federal and state regulatory compliance.

MIKE SELLERS – COO

As Chief Operating Officer of Alamo1, Mr. Sellers is responsible for directing the managerial and financial aspects of the company's operations to ensure we meet and exceed the expectations of our customers. With more than 22 years of experience in senior management positions, Mr. Sellers is recognized as a dynamic leader, motivator and results-driven professional, adept at strategic planning and operational execution to effectively drive multiple business unit operations to absolute success. He works very closely with the Alamo1 Executive Team of Vice-Presidents and Division Manager, to ensure the company is positioned for revenue growth, effectively handling and adjusting to the day to day operational challenges, so the company can continue to proactively provide solutions to customers' needs, and continue to introduce new products and services to meet customer demands in competitive environments.

Key Personnel

ROSE MENDOZA – CONTROLLER

As Controller of our San Antonio office, Ms. Rose Mendoza is directly responsible for supervising the quality of accounting and financial reporting of an organization. She oversees the financial reporting procedures and methodologies of the corporation, ensuring their accuracy and adherence to proper format and standards. Ms. Mendoza's responsibilities include managing day-to-day, monthly, quarterly and annual accounting department activities; applying generally accepted accounting principles to all activities; processing all invoices and payments to vendors and supervising timely remittances; monitoring, managing and forecasting cash flow; scheduling and directing billing to clients; preparing general ledger and financial statements on a monthly, quarterly and annual basis; monitoring activities of the firm's accounting department; negotiating and maintaining relations with banking and financial institutions and administrating the computerized accounting system.

STEVE DAUGHERTY – VICE PRESIDENT, ABATEMENT

Mr. Steve Daugherty is located in the San Antonio office, as the Abatement Division Vice President. In this role, Mr. Daugherty directs managerial and financial operations of the abatement division on a daily basis. His responsibilities include controlling overall performance and the planning of the direction of the abatement division. With over 25 years of experience, Mr. Daugherty works very closely with the Alamo1 executive team to assure that key client's initiatives are completed in a timely and responsible fashion, allowing the company to deliver the most efficient solutions and services to its clients. He is proficient in the coordination of all site activities with owners, occupants and the various contractors required on these projects

DAVID ROBLES – VICE PRESIDENT, DEMOLITION SERVICES

Mr. David Robles, Vice President of Demolition and Recycling, specializes in demolition of commercial, residential and industrial projects and is responsible for the application of company expertise and equipment in a variety of areas including waste reduction and recyclables marketing. Using a solid understanding of technical issues and Manufacturing processes, his business experience in construction has given him a thorough knowledge of the cost savings that can be realized through proper waste management. The demolition team offers clients the ability to deconstruct equipment, buildings, structures and problems through keen insight and knowledge of process systems.

Key Personnel

ERVIN WEIMAN – VICE PRESIDENT, ENERGY

Mr. Ervin Weiman is located at our Giddings office of Alamo1. As Director of Energy, he is involved with measuring, tracking, evaluating and communicating results to management. He is responsible for technical regulation of downstream petroleum sector in accordance with the requirement of the law. Effectively Mr. Weiman ensures safety and environmental enforcement functions as well as performance and business practice monitoring functions in the sector are carried out efficiently. He also provides administrative leadership for staff, evaluating performance and ensuring all staff members are properly trained for professional development

RICHARD SCHRIBER – VICE PRESIDENT, REMEDIATION

Mr. Richard Schriber is located in our Houston office. As Vice President of Remediation, he supervises and directs construction and environmental remediation services, along with the design personnel and clerical staff. He administers and coordinates the work of project staff, contractors, and consultants. Mr. Schriber acts as principal liaison with clients, contractors, and consultants on facilities, studies, or projects. He originates and prepares necessary technical contract data, specifications, drawings, and cost estimates. He also inspects quality and quantity of work, maintains accurate records of work and schedules, and ensures compliance with specifications and regulatory requirements for environmental and construction projects associated with government as well as non-government entities.

MICHAEL WILLIAMS – VICE PRESIDENT, SPECIALIZED CONSTRUCTION

As Vice President of the Specialized Construction Division Mr. Williams is an experienced professional with over 21 years in construction, facility maintenance, project management, planning, team development procedures. Responsible for the daily operations of the Specialized Construction Division, he is a highly effective and motivated senior manager with intimate knowledge of Federal, DOD and other US Government agencies construction operations. He manages the organizations operations by directing and coordinating activities consistent with the established goals, objectives, and policies. He develops action plans for major construction projects, implements programs to ensure attainment of business plans for growth and profit, and provides direction and structure of the operating units. Mr. Williams also actively participates in developing policies and strategic plans. His vast experience includes worldwide construction and security related processes. Mr. Williams works directly for the Alamo1 Executive Team while providing direct oversight of all aspects of this Division and supporting the highly demanding nature of all our customers.

Key Personnel

MILTON HARRIS – VICE PRESIDENT, SPECIALIZED TRANSPORTATION

As Vice President of Specialized Transportation, Mr. Milton Harris is one of the key components in providing our customers with the best solutions to fit their transportation needs. He is responsible for guaranteeing the capabilities of all of our specialized trailers and our professional drivers. As a result, we are able to maximize productivity and minimize costs

JOHN MCCAULEY – COMPLIANCE DIRECTOR

Mr. John McCauley has over 28 years of experience in various safety and quality related positions. He is an exceptional director with superior abilities to motivate personnel and enhance overall quality, efficiency, performance, and compliance with procedures and regulations. Mr. McCauley has a proven track record of exceptional service and support directly focused on achieving corporate and client goals and objectives safely and accurately. He focuses on compliance with all safety and operational policies and procedures. He oversees 100% accuracy of logs, records, and reports to ensure smooth deployment of resources. Mr. McCauley possesses a keen ability to recognize and implement streamlined processes that reduce errors, increase organization, and improve operational quality and efficiency.

Mr. McCauley comes to Alamo1 with an impressive military background. Serving as U.S. Air Force Chief of Safety, he was directly responsible for all aspects of installation site safety for 190 personnel. In this role, he also directed incident response and on-scene command, as well as coordinating multi-national operations. Prior to his military service, Mr. McCauley worked in the construction industry, performing interior finish out and concrete form setting. John also serves as Alamo1's corporate pilot.

ROBERT NAYLOR – DIRECTOR, STORMWATER MANAGEMENT

As Director of Stormwater Management, Mr. Robert Naylor has over 25 years of hands-on experience in Stormwater Management projects. His experience in working with owners, developers, engineers, general building contractors, subcontractors and wholesale supply contractors ensures optimal design, operation and maintenance of their system(s).

Key Personnel

LUKE GATLIN – VICE PRESIDENT, BUSINESS DEVELOPMENT

As Vice President of Business Development, Mr. Luke Gatlin is involved in everything from the development of products and services, to the creation of marketing strategies, to the generation of sales leads, to negotiating and closing deals. He is in charge of identifying new business opportunities in new markets, new partnerships with other businesses, or new ways to reach existing markets, to better meet the needs of existing markets.

BENARD WRIGHT – DIRECTOR, FUEL SERVICES

Mr. Wright is recognized expert in fuel properties and fluid flammability, combustion, and flammability mitigation. He is also a leading scientist in fuel tank flammability and explosivity. He established and supervised experimental laboratory, bench-scale, and full-scale techniques used for characterizing fluid flammability and explosion hazards. He was involved in laboratory fuel tank flammability testing for the FAA and other commercial companies. Mr. Wright has also been involved in hydraulic fluid testing and fluid specification development of fluids such as non-flammable and bio-based fluids. Mr. Wright managed the flammability-testing laboratory that certifies phosphate ester type fluid used in commercial aviation as well as all commercial fluids. He holds patents in water-emulsion fire resistant hydrocarbon fuels.

WADE HAYDEN – LEGAL COUNSEL

Wade Hayden is the legal counsel for the company. He also serves as contract administrator, coordinating and reviewing environmental proposals and contracts as well as implementing complete documentation and execution of proposals and awards.

GLENN HEGAR TEXAS COMPTROLLER OF PUBLIC ACCOUNTS

The Texas Comptroller of Public Accounts (CPA) administers the Statewide Historically Underutilized Business (HUB) Program for the State of Texas, which includes certifying minority, woman, and service disabled veteran-owned businesses as HUBs and facilitates the use of HUBs in state procurement and provides them with information on the state's procurement process.

We are pleased to inform you that your application for certification/re-certification as a HUB has been approved. Your company's profile is listed in the State of Texas HUB Directory and may be viewed online at <https://mycpa.cpa.state.tx.us/tpasscmbsearch/index.jsp>. Provided that your company continues to meet HUB eligibility requirements, the attached HUB certificate is valid for the time period specified.

You must notify the HUB Program in writing of any changes affecting your company's compliance with the HUB eligibility requirements, including changes in ownership, day-to-day management, control and/or principal place of business. *Note: Any changes made to your company's information may require the HUB Program to re-evaluate your company's eligibility.*

Please visit our website at <http://comptroller.texas.gov/procurement/prog/hub/> and reference our publications (i.e. Grow Your Business pamphlet, HUB Brochure and Vendor Guide) providing addition information on state procurement resources that can increase your company's chances of doing business with the state.

Thank you for your participation in the HUB Program! If you have any questions, you may contact a HUB Program representative at 512-463-5872 or toll-free in Texas at 1-888-863-5881.

Texas Historically Underutilized Business (HUB) Certificate

Certificate/VID Number: **1200334965600**
File/Vendor Number: **038318**
Approval Date: **10-APR-2017**
Scheduled Expiration Date: **10-APR-2021**

The Texas Comptroller of Public Accounts (CPA), hereby certifies that

ALAMO 1

has successfully met the established requirements of the State of Texas Historically Underutilized Business (HUB) Program to be recognized as a HUB. This certificate printed 14-APR-2017, supersedes any registration and certificate previously issued by the HUB Program. If there are any changes regarding the information (i.e., business structure, ownership, day-to-day management, operational control, business location) provided in the submission of the business' application for registration/certification as a HUB, you must immediately (within 30 days of such changes) notify the HUB Program in writing. The CPA reserves the right to conduct a compliance review at any time to confirm HUB eligibility. HUB certification may be suspended or revoked upon findings of ineligibility.

*Laura Cagle-Hinojosa, Statewide HUB Program Manager
Statewide Support Services Division*

Note: In order for State agencies and institutions of higher education (universities) to be credited for utilizing this business as a HUB, they must award payment under the Certificate/VID Number identified above. Agencies, universities and prime contractors are encouraged to verify the company's HUB certification prior to issuing a notice of award by accessing the Internet (<https://mycpa.cpa.state.tx.us/tpasscmbsearch/index.jsp>) or by contacting the HUB Program at 512-463-5872 or toll-free in Texas at 1-888-863-5881.
